STATINTL

MEMORANDUM TO: [REDACTED]

SUBJECT: Comments on Proposal, "Extended Analysis of Relative Position Transformations Occurring in Panoramic Photography" by [REDACTED]

STATINTL

1. NPIC has no contracts under way in this area at the present time, but I believe this is an important area and we would appreciate the conclusions of this study.

2. The analysis of the 10 items listed under "Procedure" are all worthy of study but would be most useful if they could be accomplished for a specific system; but clearances would obviously be a problem.

3. Thank you very much for a chance to view this proposal.
